

CREATIVE PLACEMAKING as ACTIVISM

ARCH 691 SUSTAINABLE SETTLEMENTS

ARTS 442/542 SCULPTURAL INFRASTRUCTURE

These classes will collaborate to look at 10 sites along the ART corridor and develop a prototype installation for one site. The installation will engage creative placemaking, public art, and community to build on public transportation as neighborhood creation. We will work with proposals, permitting, prototypes and a final event based installation. The interdisciplinary team provides learning for all backgrounds. Our Wednesday evening meetings will be based on community input and lectures. Friday morning will be proposal development and building.

WED 5:30-6:30p / FRI 9a-12n

at the LOBO RAINFOREST
